Food & Beverage Industry

Cable and CONNECTivity

For the cleanest production in the world.

Everything must be right in the production of food and beverages. Even microscopically small particles severely disrupt production processes. All components must be able to cope with the extremely high demands.

The food industry continues to grow. Of course, because we always eat and drink. However, as a cable manufacturer we have to take very special specifications into account. Our components have to be resistant to cleaners, oils, greases and acids, as well as being waterproof, rustproof and halogen-free, and they also have to withstand strong temperature fluctuations. Extremely high demands are therefore required.

Our cable and connector solutions are mainly used in the so-called splash zones and non-product zones. Various suppliers of the food industry trust us. And you can be sure that you have already had a drink in your hand in which a cable from our production was involved.

We have the know-how and broad portfolio to always offer the right solution.

TKD Product Overview
TKD is the distributor of Infinite Electronics, specialized in all types of cables.
TKD has decades of experience in design and application technology, combined with a strong awareness of quality and environment. This gives our customers the security of receiving innovative and high-quality products, even for the most demanding requirements.

Footprint in 8 countries, and active globally with our partner network.

Own branches in:

- Germany
- Belgium
- Netherlands
- Poland
- Italy
- France

- USA
Globally active

Welcome to the product portfolio of TKD Kabel GmbH. We are one of the world's leading suppliers of cables, ready-to-connect cable systems and cable accessories.

Since 2023 we are part of Infinite Electronics, and since then a progressive and international player in the specialty cable and connectivity solutions market.

Infinite Electronics was formed from the merger of several successful companies in the cable and connectivity industry. The group of companies produces, distributes and assembles special cables as well as cable harnesses and accessories.

Distribution

knowledge company with added value in cables and accessories for wholesale and OEM customers with branches in the Netherlands, Belgium, Germany, Italy, Poland, France, China and the USA.

Assembly

customer-specific assembly of connectivity solutions for OEM customers with own locations in the Netherlands, Poland and Germany.

Production

the production of a wide range of special cables.

"

Around the world, our team members work urgently to provide connectivity solutions and support, giving our customers what they need, when they need it.

KAWEFLEX®

Our KAWEFLEX® series is specifically designed for moving use in drag chain applications, such as in food and beverage industry or robotics. All cables are designed for several million bending cycles and can be used for normal, increased, high or highest requirements.
The compact design and advanced stranding technology ensure slim cables with low weight. From data and control cables to power supply, everything is available that the food and beverage industry and robotics need: Shielded or unshielded, hybrid or halogen-free products - with a wide variety of cross-sections and core counts.

Always choose the optimum cable for your application from up to three different quality levels, both for indoor and outdoor applications, long travel distances or the smallest bending radii. Our KAWEFLEX® cables have been developed to withstand mechanical stress, tensile strength and a wide range of environmental influences, making them extremely versatile. Their range of applications extends from crane and port installations, where the cables are affected by wind and weather, to highly dynamic applications in machinery and plant engineering.

KAWEFLEX® Highlights

KAWEFLEX® 6310 SK-PVC UL/CSA

electronic drag chain cable for data and signal transmission for normal requirements in drag chains and moving drive systems.

KAWEFLEX® 5288 SK-C-PUR UL/CSA SERVO 0,6/1kV

shielded, low capacity power cable, also with 2, 3 resp. 4 control cores for temperature sensors or brake for EMC-compatible connecting between drives and frequency converter for high requirements in drag chain applications, moving drive systems, in the field of robotic technology, in manufacturing plants as well as in dry and humid rooms.

KAWEFLEX® 6130 SK-PUR UL/CSA

as highly flexible, low capacity power and control cable for high electrical and mechanical requirements in drag chains and motion drive systems in machine and plant engineering.

KAWEFLEX® Allround 7240 SK-C-TPE UL/CSA

power and control cable for EMC compatible connecting at highest requirements in drag chain applications, for machining centers, machine and plant engineering in the field of crane and conveyor facilities, in compost-, sewage and car wash facility, laundries, in the chemcial industries as well as in the food- and beverage industrie. Applicable in dry and humid rooms also outdoor.
Our product groups for the Food & Beverage Industry

Industrial automation has experienced significant change in recent decades and has become a key factor in various industries. like food and beverage. Automation technologies now make it possible to optimize production processes, increase efficiency and improve the quality of products.

Whether in control and data cables for robots, low-frequency electronic cables or fiber optic cables for large amounts of sensory data: Anyone who automates needs a partner who can respond flexibly to the requirements of digital transformation and also offer a large portfolio of solutions and cables. Our customers appreciate us for our solution proposals, short delivery times and the ability to develop even special solutions in a short time.

We are proud to offer high quality and certified cables and wires that meet the specific requirements of the food industry. Our experienced team is available to help you select the right products for your individual applications and environments.
